

Maybe it does take a rocket scientist

As a physicist, my education and work background give me a unique advantage over other candidates. I understand the science behind important issues such as energy, the environment, technology, defense and national security. I solve difficult problems daily, and look forward to doing the same in Congress if I have the privilege of being elected.

A vote for McClung is a vote for

- Creating jobs
- Protecting small businesses
- Balancing the federal budget
- Lowering taxes
- Limiting government
- Protecting Social Security
- Improving education
- Protecting our national security
- Securing our borders
- Defending our freedoms
- Supporting our military and veterans
- Protecting life and family
- Improving healthcare (not transforming)

“Out of control government spending imprisons us with debt and results in higher taxes and increased poverty. Through this unprecedented debt we are robbing from our children and grandchildren, and depriving our seniors of the resources they will need. If I am elected, I will work to bring back jobs, restore economic prosperity, and reduce government spending. I will empower the people not the government” *Ruth-*

“Ruth is a conservative Republican that a Democrat can vote for” Margarita Zavala
